

TG Updates from Winter Range 2018

- 1. Angled/slanted ammo on cartridge belt is legal; this includes shotgun shells.**
- 2. Rooster shooter grips and all copies of this grip are now illegal. This rescinded the prior approval granted.**
- 3. Next shooter handbook update will be completed in Jan 2019 and should incorporate everything into one book.**
- 4. Next TG Summit may be 18-24 months but will be scheduled only if there is a need.**
- 5. Where a shooter is called for bullet impact violation less than 5 feet or from 5 to 10 feet from shooter, the measurement will be made from the toe of the shooter's boot to the point of impact. Also a reminder, any discharge deemed unsafe is a MDQ.**
- 6. A shooter holding a long gun in one hand and attempting to shoot another gun must clear the long gun before firing next gun. Rule: MSV, for failure to clear rounds in long gun before firing next firearm.**
